Postdoctoral position available!

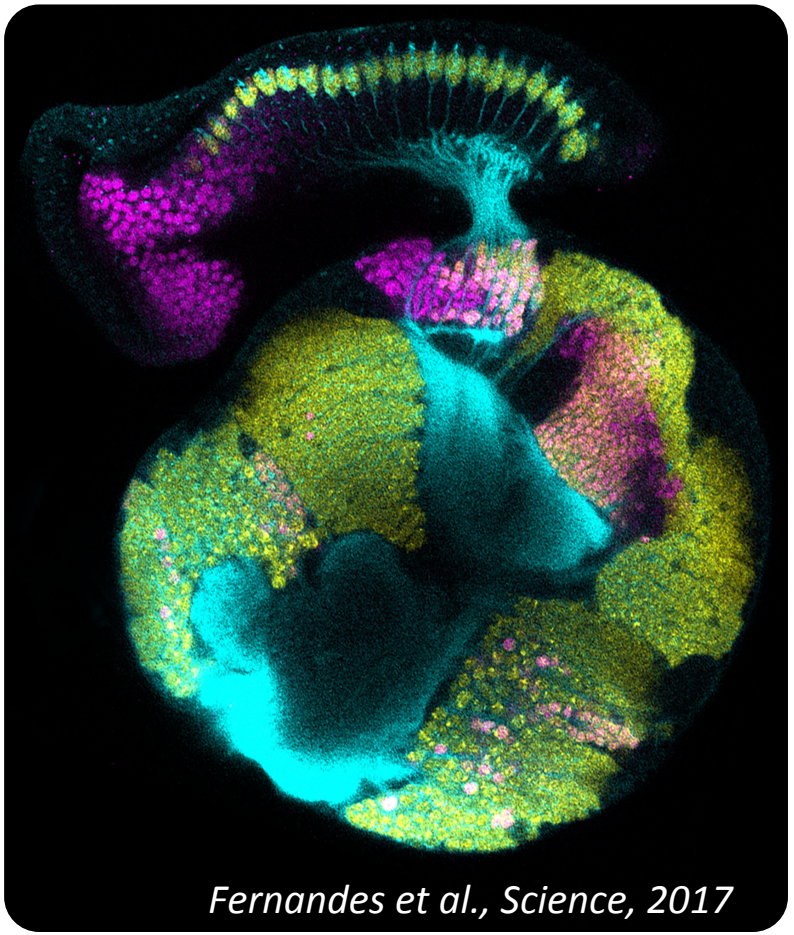
UCL

The Fernandes lab is a developmental genetics lab that uses the *Drosophila* visual system to explore how diverse cell types of the brain are specified in the right place, at the right time and in the right stoichiometry.

We are looking for an intellectually curious and motivated postdoctoral fellow to join in the fun uncovering the general principles that underlie brain development at University College London.

Please send a CV and cover letter describing research interests to Dr. Fernandes at **vilaiwan.fernandes@ucl.ac.uk**

Note: Our lab and UCL value and support diversity. Funding is guaranteed beyond Brexit.



Fernandes et al., Science, 2017
